

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application. An identifier indicating the status of each claim is provided.

Listing of Claims:

1. (Currently Amended) An electronic-program-guide retrieval method comprising the steps of:

~~accessing an electronic program guide database storing electronic program guide data based on an input retrieval keyword;~~

accessing a dictionary database based on an input retrieval keyword;

extracting relevant-keyword information relevant to said input retrieval keyword from ~~a~~ the dictionary database; ~~and~~

accessing an electronic-program-guide database that stores electronic-program-guide data based on the input retrieval keyword and the extracted relevant-keyword information;

and

downloading only ~~desired~~ electronic-program-guide data based on the extracted relevant-keyword information from the electronic-program-guide data stored in said electronic-program-guide database and the input retrieval keyword.

2. (Previously Presented) An electronic-program-guide retrieval method according to claim 1, wherein said dictionary database stores words to be used as retrieval keywords, and relevant keywords relevant to said words to be used as retrieval keywords.

3. (Previously Presented) An electronic-program-guide retrieval method according to claim 1, wherein when the retrieval keyword is the name of a person, the relevant-keyword information is one of or a combination of a nickname of said person, the full name of said person, the given name of said person, the name of a group relevant to said person, and another well-known name of said person.

4. (Previously Presented) An electronic-program-guide retrieval method according to claim 1, wherein when the retrieval keyword is a word written in hiragana characters and/or katakana characters used in Japanese writing, the relevant-keyword information includes a word written in kanji characters used in Japanese writing or in characters relevant to said kanji characters.

5. (Previously Presented) An electronic-program-guide retrieval method according to claim 1, wherein when the retrieval keyword corresponds to one of misused character keywords stored in a misused keyword database which are caused by possible input mistakes, only the relevant-keyword information is used to perform retrieval.

6. (Previously Presented) An electronic-program-guide retrieval method according to claim 1, wherein the retrieval keyword and the relevant-keyword information are interrelated to each other.

7. (Previously Presented) An electronic-program-guide retrieval method according to claim 1, wherein when part of a word to be used as the retrieval keyword is input,

said word to be used as the retrieval keyword and the relevant-keyword information are extracted from a retrieval-keyword database storing previously input keywords in a predetermined order.

8. (Previously Presented) An electronic-program-guide retrieval method according to claim 1, wherein when the retrieval keyword belongs to a particular genre, the relevant-keyword information belongs to a genre different from said particular genre.

9. (Previously Presented) An electronic-program-guide retrieval method according to claim 8, wherein when the particular genre is relevant to cooking, the different genre is relevant to cooks.

10. (Previously Presented) An electronic-program-guide retrieval method according to claim 8, wherein when the particular genre is relevant to place names, the different genre is relevant to one of or a combination of neighboring city names, country names, and regional names.

11. (Currently Amended) An electronic-program-guide retrieval system comprising:

a data server including an electronic-program-guide database storing program information of an electronic program guide;

~~a client module comprising access means for accessing said electronic program-~~
~~guide database and input means for inputting a retrieval keyword for retrieving the program~~
~~information; and~~

a dictionary database for storing retrieval keywords and relevant keywords
relevant to said retrieval keywords; and
a client module comprising:
input means for inputting said retrieval keywords;
access means for accessing said dictionary database based on said retrieval
keywords;
extracting means for extracting relevant-keyword information relevant to
said retrieval keywords;
access means for accessing electronic-program-guide database based on
retrieval keywords and extracted relevant-keyword information; and
downloading means for downloading only electronic-program-guide data
based on the extracted relevant-keyword information and the input retrieval keyword.
~~wherein relevant keyword information relevant to the retrieval keyword input by~~
~~said client is extracted from said dictionary database, and selective retrieval by accessing only~~
~~program information related to the extracted relevant keyword information and the input~~
~~retrieval keyword is performed.~~

12. (Previously Presented) An electronic-program-guide retrieval system
according to claim 11, wherein said dictionary database is provided at the client side.

13. (Previously Presented) An electronic-program-guide retrieval system
according to claim 11, wherein said dictionary database is provided at the data server side.

14. (Previously Presented) An electronic-program-guide retrieval system according to claim 11, wherein said client downloads and stores the program information.

15. (Previously Presented) An electronic-program-guide retrieval system according to claim 11, wherein said client accesses a necessary part of said data server via a routing server storing information on routes to the parts of said data server.

16. (Previously Presented) An electronic-program-guide retrieval system according to claim 11, wherein:

said dictionary database stores misused keywords caused by possible input mistakes; and

when the input keyword corresponds to one of the misused keywords, only the relevant-keyword information is used to perform retrieval.

17. (Previously Presented) An electronic-program-guide retrieval system according to claim 11, wherein when the retrieval keyword is a word written in hiragana characters and/or katakana characters used in Japanese writing, the relevant-keyword information includes a word written in kanji characters used in Japanese writing or in characters relevant to said kanji characters.

18. (Previously Presented) An electronic-program-guide retrieval system according to claim 11, wherein said dictionary database stores previously input keywords so that

the input keywords are included in the relevant-keyword information, and the stored keywords are arranged in order of frequency of use.

19. (Previously Presented) An electronic-program-guide retrieval system according to claim 11, wherein the program information includes data relevant to movie information.

20. (Previously Presented) An electronic-program-guide retrieval system according to claim 11, wherein the program information includes data relevant to drama information.

21. (Previously Presented) An electronic-program-guide retrieval system according to claim 11, wherein the program information includes data relevant to place names.

22. (Previously Presented) An electronic-program-guide retrieval system according to claim 11, wherein the program information includes data relevant to the names of dishes.
